Veronica “Nonika” Reingold

Nonika.ca — Contact@Nonika.ca — VeronicaReingold — Pekcus

- Unity game developer with experience designing artificial intelligence agents.
- Fullstack software engineer with experience across multiple languages and frameworks.
- Graphic design experience for game and web development.

TECHNICAL SKILLS

Unity • C# • .NET • Redux • TypeScript • JavaScript • Python • Java • SQL • C • HTML • CSS • Git • LINQ
React • Astro • State Machines • Behaviour Trees • Machine Learning • Deep Learning • AI for Games

EXPERIENCE

Software Developer November 2026 to Present
Hyper Hippo *Remote*
- Developing backend analytics and transactional pipelines in C# ASP.NET.
- Developing Unity integrations for backend services.

Software Developer January 2026 to August 2026
Rocket Innovation Studio *Windsor, ON, CA*
- Fullstack development using C# ASP.NET, React, Redux, TypeScript, and Insomnia.
- Developed and maintained core microservices utilized across multiple Rocket divisions.

Researcher January 2025 to Present
WASP Labs *Windsor, ON, CA*
- Conducting research on leveraging LLMs to revolutionize game development pipelines and improve player onboarding.
- Presented my research proposal at the AI and Games Conference 2025.

Software Developer March 2025 to Present
Women in Computer Science Club *Windsor, ON, CA*
- Developing the club’s website in React.
- Collaborating with team members to manage and organize tasks.

Graduate and Teaching Assistant January 2023 to Present
University of Windsor *Windsor, ON, CA*
- Instructed students on game development with Unity.
- Taught artificial intelligence concepts, algorithms, and data structures.

EDUCATION

Master of Science in Computer Science Started May 2025
University of Windsor – 95.8% Average
- Artificial Intelligence Stream

Honours Bachelor of Computer Science June 2024
University of Windsor – 94.8% Average
- Game Development Specialization
- Minor in Mathematics – 88.33% Average
- Minor in Communications, Media and Film – 86.17% Average

PROJECTS

Cat Caretaker
3D Unity Game
- Developed a Unity game in four days for a game jam ranking twelfth out of 72 teams for innovation.
- Implemented an AI agent controlled via a finite state machine.

Little Alien Jumps Home
2D Hyper-Casual Unity Game
- Developed an infinite game loop with efficient object pooling.
- Implemented animations, user interface design, scene management, and persistent player data.

Dungeon Crawler *University of Windsor*
Thematic 2D Unity Game
- Implemented procedural generation techniques including a random walk algorithm.
- Designed algorithms to detect room access and spawn enemies.

Artificial Intelligence for Games Projects *University of Windsor*
Advanced AI for Games Concepts implemented in Unity
- Implemented sensors and actuators, finite state machines, navigation, and multi-agent behaviours.
- Developed visual graphs for defining state machines and tracking their transitions.

Bazar Ukrainian & International Food Website *Freelance*
Website for a Local Business
- Developed a lightweight, single-page website.
- Configured the domain, email, and hosting.

H&M Virtual Closet *University of Windsor*
Google Chrome Extension
- Developed for the ADA Mentorship Program.
- Programmed a virtual closet with a drag-and-drop user interface allowing customers to put together outfits.
- Won awards for the best and most creative project.

Women in Computer Science Club Website *Women in Computer Science Club*
Website built using React
- Building responsive front-end features.
- Collaborating with team members using GitHub and Notion.

Database Management System *University of Windsor*
Web-based DBMS for a SQL Database
- Implemented a hospital database schema in third-normal form.
- Collaborated with team members using GitHub for version control.

SPEAKER

- AI and Games Conference 2025
- Waterloo DevFest 2025
- Google Developers Group Windsor DevFest 2025 and 2026
- University of Waterloo WiCS Conference 2026
- University of Detroit Mercy – Accessibility in Games Guest Lecture

AWARDS

- NSERC Canada Graduate Research Scholarship – Master's (CGRS M) – $27,000
- Vector Institute Scholarship in Artificial Intelligence – $17,500
- Ontario Graduate Scholarship – $15,000
- Master's Research Entrance Award – $7,500
